

# FPP Fuel Sentry System

**FPP** METERS

## **FPP Meters Fuel Sentry System**

provides accurate fuel consumption measurement for diesel engine driven generators. An accurate indication of fuel consumption is essential to maximize engine operating efficiency reducing expensive

mechanical failure or minimizing engine emissions. These economical systems quickly pay for themselves in increased fuel economy or increased operating time when emission controls restrict usage. Whatever your requirements, the **FPP Meters Fuel Sentry System** provides an economical solution to your fuel monitoring needs.

## **Features:**

- Accurate
- Rugged
- Reliable
- User Friendly
- Easy Installation
- Tamper Proof

## **Benefits:**

Improved Fuel Economy  
Controlled Emissions

Suitable for Harsh Environments  
Low Cost of Ownership  
Field Programmable  
No Special Tools or Skills  
Reliable Data

## **Specifications:**

- Accuracy: +/- .5%, System Dependent
- Enclosure: Die-Cast Aluminum IP67/NEMA 4x
- Operating Temperatures: -30°C to +80° C (-22°F to +178°F)
- Data Protection: EEPROM Backup of All Settings
- Input: 2-Channel (A-B)
- Dimensions: 130mm x 114mm x 58mm (5.1" x 4.5" x 2.3")
- Display: Seven 17mm Characters  
Eleven 8mm Characters  
Displays Total and Grand Total
- Security: Password Protected

## **Options:**

- 8-28V External AC/DC Input
- Temperature Input
